Initial Consultation Report
Tara A. Fantauzzi, Professional Genealogist

The purpose of this report is to summarize the data and goals for your project. Please review the information in this report carefully and report if any additional information is known at project start or if any of the information should be changed or corrected.

Summary of Research Recommendations:

Client submitted a written pedigree chart for project start that contains starting point information for his family history before any research time has been applied. He has not completed any previous research so the information presented at project start is from family oral history. Genealogist created a one-page pedigree chart to visualize what is known at project start and the chart can be found at the end of this report.

Genealogist recommends applying up to two hours of research time completing a digital collections survey on the direct maternal ancestors of Conrad Romo beginning with the identities of his mother Maria Evangelina Beltran Perez with an emphasis to learn more about the identities of her direct ancestors going back in time. The goals of the survey will be to verify and prove what is known at project start and to establish and prove the identities of previously unknown direct ancestors.

> *Digital Collections Survey is a term we use to describe a research survey that exhausts all available collections of documents that are published online including but not limited to Ancestry.com and other premium information service databases. Copies of original documentation may include census, vital, military, probate, land and church records; secondary documentation may include copies of record transcriptions, record index entries and published genealogies.*

Itemized List of Research Recommendations:

Digital Collections Survey, Up to 2 hours research time

- Research survey on the identity of direct maternal ancestors of Conrad Romo beginning with the identities of his mother Maria Evangelina Beltran Perez that will search all available collections of documents that are published online including but not limited to Ancestry.com premium databases. Copies of original documentation may include census, vital, military, probate, land and church records; secondary documentation may include copies of record transcriptions, record index entries and published genealogies.
